### **DETAILED ACTION**

This Office Action is in response to the communication filed on 7/8/04. Applicant has amended to claims to recite multiple species for the polymer material, which requires an election of species. This Action is non-Final.

#### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention: the polymer material (species recited in claim 1) and the modifier (species recited in claims 23 and 26-28).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was not made to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant stated in the remarks section of the amendment filed on 7/8/04 that an IDS was not submitted on 9/4/01. Furthermore, Applicant did not receive a copy of the initialed IDS (PTO-1449). Applicant is correct regarding the submission date of the IDS. The only IDS statement entered in PALM was filed on 1/4/02, not 9/4/01. The Examiner mistakenly entered the filing date of the application instead of the filing date of the IDS. An initialed copy of the IDS is attached to this Office Action.
